

# STICK LITE S

Universal hand lamp in slim design with 200 lumen

The STICK LITE S is ideal for those who value good, compact design combined with uncomplicated functionality. Regardless if it is for everyday use or a tough job, the STICK LITE S delivers as promised: optimal brightness and handy design at a fair price.

## // New upgraded version

Compared to the first generation, STICK LITE S has been upgraded with the highly efficient COB LED technology, now providing up to 200 lumen. It has also been upgraded with a stepless dimmer function in the range of 10 % to 100 % that enables you to easily adjust the light output to the work task.

Born rechargeable, the powerful STICK LITE S with torch light function enables convenient and precise work. The STICK LITE S is thus recommended for everyone who needs universal, sturdy and handheld work lights. The practical built-in magnet allows you to benefit from the bright light of the handlamp and still having both hands free for work.

The ultra-thin design with round shapes makes STICK LITE S comfortable to carry in the pocket ready at hand for the daily inspection tasks. The slim designed hand lamp is also optimized in weight to provide maximum working comfort.

- Powerful hand lamp with top light function
- Providing up to 200 lumen
- Ultra lightweight for maximum working comfort
