Brand: [Milagro](#)

DESCRIPTION

The LUNA collection consists of four types of lamps. Among them you can find a wall lamp and hanging ceiling lamps with one and three points of light under one lampshade and with three separate shades for each point of light. Lamps are made of metal and glass. They have an E14 thread. The lamps can be adapted to various types of interiors thanks to the possibility of adjusting the height of the overhang from 50 to 90 cm.

LUNA is a collection of lamps that will perfectly match the classic interior design. The combination of metal, chrome glass shade and crystals gives an effective and elegant effect. The lighting will work both in passageways and in a stylish living room, dining room or guest room. By combining lamps from the Nova collection, you can create an interesting and coherent arrangement.

Lighting from the LUNA collection is covered by a 24-month warranty.
