**DESCRIPTION**

**Reliable solar lamp by Eko-Light is a proposal for all seekers of original solutions. Modern design will give your garden an individual character.**

**A standing solar lamp resembling a torch with its structure perfectly imitates a flame, and at the same time is completely safe and energy-saving. It has a Ni-MH 2/3 AAA 1.2V/300 mAh battery with a power of 0.1 W, which is charged using solar energy. The slim design of the 10x10x65 model and the spike it is equipped with, as well as the lack of cables make it practical to assemble. Just stick it into the ground - grass or earth.**

**The product is covered by a 2-year warranty period. After this time, you can use a specialized company service.**
