DESCRIPTION

MEGAN lamps - stylish ceilings for demanding

customers. Lamps from the MEGAN collection of the Polish brand MiLAGRO represent everything that is required of modern ceiling lighting: they provide the optimal level of brightness, attract the eye with an excellent design, and are easy to control with a remote control. This series includes two round white plafonds, differing in size. The large model has a diameter of 48 cm, the smaller one - 30 centimeters.

Minimalistic and at the same time extremely elegant MEGAN lamps are a perfect proposition for modern interiors. The round shape in combination with subtle colors will perfectly match white furniture, uniform colors and smooth textures. Both the smaller and larger ceiling can be successfully installed in a spacious living room, as well as in a small, bright bedroom. In the latter, it is best to hang the ceiling just above the bed, because when you turn on the appropriate function, the lamp can provide an almost magical effect of a starry sky.

MEGAN collection - perfect design coupled with functionality

Ceiling lamps from the MEGAN collection catch the eye with a fantastic look, and also impress with the highest quality. They are made of very durable metal, resistant to damage and the passage of time, as well as of modern plastic. The larger model includes a 48 W LED light module, and the smaller one with a power of 24 W. Guided by the care for users and wanting to provide them with maximum comfort, the manufacturer also equipped both plafonds with remote controls, enabling, among other things, the inclusion of the flashing star effect and light color change.

The collection of MEGAN lamps consists of the following models:

- Ceiling ceiling lamp with a diameter of 48 cm ML6397
- Ceiling ceiling lamp with a diameter of 38 cm ML6396
