DESCRIPTION

TERMA line - plafonds for your interior

The TERMA line consists of four unique plafonds. They are distinguished by a modern and minimalist design. Their round shape and soft lines as well as perfectly refined details will delight even the most demanding aesthetes. MILAGRO ceiling lights are a good way to subtly illuminate a bedroom, living room or dining room. They will be perfect if we do not want the chosen lamp to have a specific style of design. In addition, their great advantage is energy efficiency. The installed 28W LED light source allows for significant energy savings.

TERMA line plafonds are available in two casing color versions: white and black. There are also two sizes available, which allows for any adaptation of the lamps to the dimensions of the room. The diameter of the smaller plafond is 280 mm and the height is 40 mm. In turn, the larger model has a diameter of 360 mm. Its height is also 40 mm.

TERMA lamps - minimalist design by Eko-Light

TERMA lamps are very durable and safe when used. They are made of carefully selected plastic and abrasion-resistant metal. The plafonds are described with the degree of protection IP44, which means that they are protected not only against harmful dust, but also against moisture. Therefore, they can be successfully installed, for example, in bathrooms, basements or attics.

The plafonds provide a very pleasant neutral light with a color temperature of 4000K. The luminous flux is 1260 lumens. The rated voltage of this lighting is 230V, and the power frequency is 50Hz. The product is covered by the manufacturer's warranty.

The TERMA line - designed and produced by Eko-Light - consists of four unique lamp models:

- white TERMA ceiling lamp, 280 mm diameter ML6401
- black TERMA ceiling lamp, 280 mm diameter ML6402 -
- white TERMA ceiling lamp, diameter 360 mm ML6403
- black TERMA ceiling lamp with a diameter of 360 mm ML6404
