DESCRIPTION

LINES lamps - elegance in a loft edition

The LINES lamp collection of the Polish brand MiLAGRO is an ideal example of lighting designed with industrial spaces in mind. This product family includes four models: one wall lamp and three pendant lamps: with one, three and five light sources. They are connected by a subtle combination of small wooden frames and black metal elements, as well as the lack of covers for bulbs, thanks to which the whole looks very effective.

The LINES lamp family is a real treat for lovers of loft climates, as well as for people who value minimalist elegance in a Scandinavian edition. As many as four different models of lamps provide enormous arrangement possibilities, while maintaining a consistent interior style. A subtle wall lamp or a single overhang on a round rosette will be perfect above a wooden chest of drawers in the living room, next to a round mirror in a black, metal frame in the hall or above an armchair in the reading corner. Hanging lamps with three and five light sources on rectangular strips will look best over an oak table in the dining room, kitchen island or as the main source of lighting in the room. An interesting option in the case of LINES hanging lamps is the possibility of adjusting their height, independently of each element.

The LINES series - quality and elegance in one

. The LINES collection, as befits a family of lamps dedicated to industrial spaces, is made of natural wood and metal. The manufacturer recommends that the luminaires from this line use decorative E27 bulbs with a power of 60 W, for example resembling round bulbs with a clearly visible filament. Thanks to this, the visual effect will be even better, and the arrangement will be refined in every detail.

The LINES lamp collection includes:

- Wall lamp on a round rosette MLP8824
- Single pendant lamp on a round rosette MLP8825
- Triple pendant lamp on a rectangular strip MLP8826
- Five-element pendant lamp on a rectangular strip MLP8827
