## DESCRIPTION

---

FARO collection - modern minimalism

The FARO lamp line was designed by the Polish brand MiLAGRO. Their minimalist, but also very interesting and modern design catches the eye. The lamp holder has an unusual shape. Its appearance resembles an inverted, deep plate that neatly wraps around the light source. Its black color, which adds a raw, industrial character to the structure, is complemented by rectangular elements made of light wood. Thanks to this, the lamps from the FARO line bring a lot of warmth into the interior and thus it becomes much more cozy.

The FARO lamp collection is a complete set of lamps that will allow you to beautifully illuminate the interior of any size. The pendant lamp, equipped with two or three light sources, will look beautiful when hung, for example, above the table in the dining room or in the living room. A wall lamp will be a great complement for her. Suspended on the side, it will complete the interior of the room while providing soft light.

FARO lamps will be suitable for interiors decorated in a minimalist or graphic style. Their expressive design will perfectly harmonize with natural wood, and will also break intense colors, such as red, bottle green or slightly more subdued white.

The FARO line - extraordinary attention to detail

What distinguishes the models from the FARO series is their very high quality. Extremely durable metal was used for their production, as well as above-average durable wood. Thanks to this, when you decide to buy lamps from the Polish brand MiLAGRO, you can be sure that the selected models will at least be used to change the interior design.

Each of these three lamps has a place for a light source labeled E27.

The FARO collection includes the following models:

- Black wall lamp MLP7455
- Black hanging lamp with two light sources MLP7456
- Black hanging lamp with three light sources MLP7457.
