DESCRIPTION

Lamps from the LINO collection - the magic of linen

What is the uniqueness of the LINO lamps designed by the Polish brand MiLAGRO? High-quality linen was used to make their lampshades. Its texture is visible, and the fabric is not clumped and transmits light. As a result, the lighting in a given room is very delicate and subtle. The rawness of linen lampshades is complemented by metal handles in shades of cool gray. This slightly ascetic design is broken by golden details, which gives the whole a bit of shine. The LINO lamp collection is very extensive. It consists of as many as 10 unique lamp models that complement each other perfectly. This allows you to illuminate several rooms in one house in a consistent manner, as well as to adjust the lamp models to our individual needs.

The collection is dominated by simple and geometric forms, which is why these lamp models will be suitable for modern interiors, where bright colors and natural raw materials are used. The latter will go great with flax.

LINO series - the highest quality of workmanship

The LINO line includes ceiling lamps - round and square, with three or two light points. In addition, there are also two wall lamps, a pendant lamp, as well as a study and a standing lamp. These will work as additional light sources. Each of these lamp models has been equipped with an appropriate number of places for the E27 light source, and one of the wall lamps has an additional GU10 point. Care was also taken that the lamps were made of high-quality materials. This will allow you to enjoy the perfect look of lighting for many years to come.

The LINO line is covered by the manufacturer's warranty.

The LINO collection includes the following lamp models:

- Wall lamp MLP7493
- Wall lamp MLP7494
- Rectangular ceiling lamp with two light sources MLP495
- Rectangular ceiling lamp with three light sources MLP7496
- Round ceiling lamp with two light sources MLP7498
- Round ceiling lamp with three light sources MLP7499
- Round ceiling lamp with three light sources MLP7500
