## DESCRIPTION

**A modern Milagro lighting set designed for mounting in a rail system. The set includes three spotlights from the Pipe family (1xGU10) and a 1-circuit track with a length of 1.5 m. Solutions of this type are widely used both inside residential and commercial premises. The spotlights can be plugged in anywhere on the rail, moved, rotated - thanks to which we can easily direct the light to the point we choose. An additional advantage of the luminaires is the replaceable light source, thanks to which we can easily adjust the appropriate color of light, and in the event of a failure, we can easily replace the bulb.**
