8719514476837

High-quality light

- Warm white light 2,700 K

Highlights

Long lifetime up to 25,000 hours

Reliable high-quality LED light lasts up to 25,000 hours. You can rest easy knowing that you won't have to worry about maintenance for years, while enjoying the perfect garden light every night.

5-year warranty on LED system

In addition to the standard 2-year warranty offered for this luminaire, Philips also offers a 5-year warranty on the LED system (the LED module and driver).

High-quality LED light

These LED lights use a unique technology developed by Philips. They turn on instantly and produce optimal light output that brings out the vivid colours in your garden.

High-quality aluminium and superior synthetics

This Philips light is made specifically for outdoor spaces. It's hard-wearing and built to last, so it will light up your garden night after night. It's constructed from high quality die-cast aluminium and superior synthetics.

IP44 – weatherproof

This Philips outdoor light is especially designed for humid outdoor environments and has been tested rigorously to ensure water resistance. Its IP44 rating means that it has been certified to offer ingress protection against dust and splashing water – perfect for general outdoor use.

Dual-brightness light

Create a flexible and appealing ambience with the dual-brightness feature. The light dims when idle and automatically brightens when people are present, delivering the right level of light whenever you need it.

Motion and dusk-to-dawn sensor integrated

With a built-in motion sensor, these lights automatically welcome you when you return home after dark, or light up when visitors arrive. The unique dusk-to-dawn feature turns the lights on automatically when it gets dark outside – perfect for those long summer evenings or to ensure your safety.

Warm white light 2,700 K

Did you know that different shades of white light are identified by different colour temperatures, measured in Kelvin (K)? Lower colour temperatures produce a warm, cosy white light, while higher colour temperatures produce a cool, more energising white light. This luminaire produces warm, relaxing light at 2,700 K.

Specifications

Design and finishing
