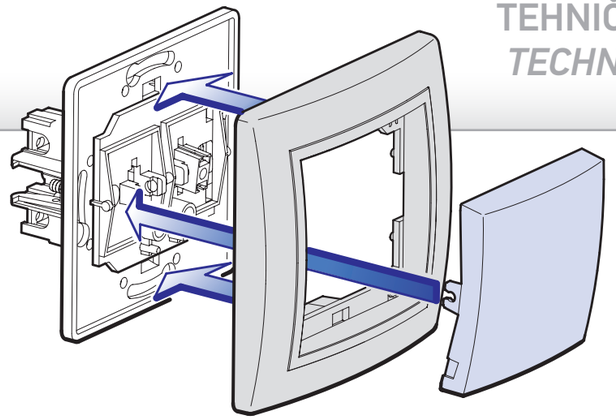
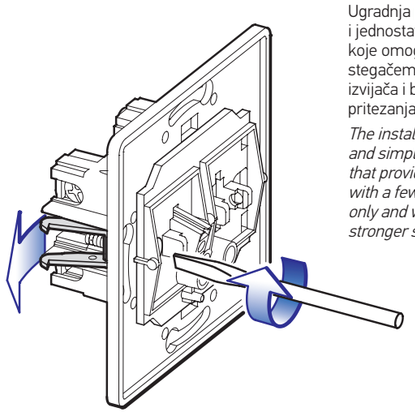
TEHNIČKE PREDNOSTI
TECHNICAL ADVANTAGES



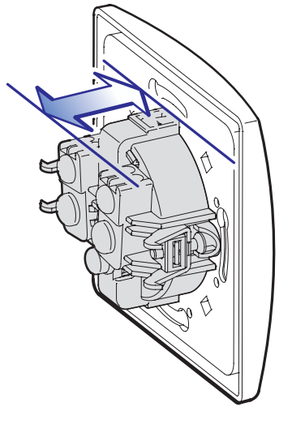
Masku i taster sklopke postavljamo i skidamo veoma jednostavno.
Ova kombinacija će Vam i pored jednostavnosti obezbediti dugotrajan i pouzdan rad.

Installation of decorative cover frame and switch button is very simple and easy.
Beside simplicity, this combination is providing a long and reliable usage.



Ugradnja pomoću stegača je brza i jednostavna zahvaljujući rešenju koje omogućava pritezanje stegačem sa vrlo malo okretaja izvijača i bez potrebe jačeg pritezanja vijka.

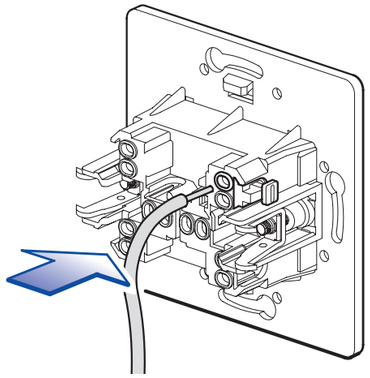
The installation by clamps is quick and simple thanks to the solution that provides tightening by clamps with a few screwdriver turnings only and without any necessity for stronger screw tightening.



Plastična priključnica je izrađena tako da zauzima veoma malo prostora u montažnoj kutiji čime se montaža pojednostavljuje zbog većeg prostora za smeštaj provodnika. Priključivanje provodnika je veoma brzo jer je obezbeđeno njegovo postavljanje bez mogućnosti isklizavanja tokom pritezanja.

Socket outlet is made to take a very little space in installation box. Installation is simple because of enough space for conductors. Connecting of wires is fast since there is no possibility of slipping out when tightening.

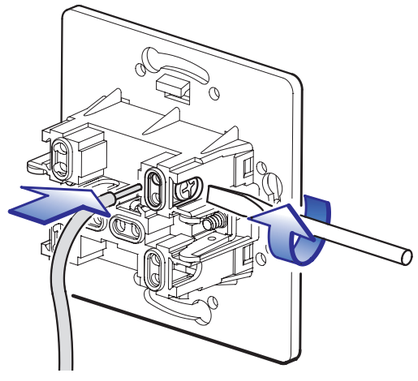
BEZVIJČANA MONTAŽA
SCREWLESS INSTALLATION



Bezvijčani kontakti omogućuju pouzdanu i brzu montažu do dva provodnika preseka 2,5mm^2, bez upotrebe alata za stezanje.

Screwless contacts are allowing safe and fast installation up to two conductors with diameter 2,5mm^2, without screwdriver.

VIJČANA MONTAŽA
INSTALLATION WITH SCREWS



Pritezanje provodnika obezbeđeno je pouzdanom i sigurnom vijčanom vezom za provodnike preseka do 4 mm^2. Priključivanje provodnika je veoma brzo jer je obezbeđeno njegovo postavljanje bez mogućnosti isklizavanja tokom pritezanja.

The tightening of conductors is provided by the reliable and safe screw joint for the conductors section to 4 mm^2. The connecting of conductors is very quick as their setting up is secured without any possibility of slipping out during tightening.

BOJE PREDNJIH ELEMENATA
FRONT ELEMENTS COLORS

Mogućnosti kombinacija više boja date su trocifrenom šifrom proizvoda (za kompletne proizvode) ili jednocifrenom šifrom (za mehanizme bez maske i međurama, maske i međuramove) u zavisnosti od elementa:

prva cifra - šifra boje maske

druga cifra - šifra boje međurama

treća cifra - šifra boje središnjeg dela (taster, blok)

Kod jednocifrenog označavanja šifra predstavlja boju jednog elementa (taster, blok, maska, međuram).

Standardno se izrađuju boje:

The possibility of colors combination is given by three-digit code of product (for the complete products) or one-digit code (for mechanisms without mask and interframe, masks and interframes) depending on element:

first digit *- code of mask color*

second digit *- code of interframe color*

third digit *- code of middle part color (push-button, block)*

One digit code represents the color of one element (button, block, mask, inter-frame)
