

Designed with you in mind

Audio-enabled LED projector light

With its 1000-lm flood light, 250-lm spot and variable beam, the Philips Xperion 6000 Flood audio-enabled projector gets the job done. The smart-zoom knob and motion sensor simplify control, while Bluetooth speakers are music to the ears.

See where others can't

- Powerful white light (1000 lumen / 10 W) lights up large area
- The two most used lights combined into one lamp

Highly versatile

- ${}^{\textstyle \bullet}$ Recharge other devices with a useful USB port
- · Bluetooth audio speakers

Smart, ergonomic design

- Motion detection enables remote control for your light
- · Smart-zoom knob to easily control your light
- · Smart handle to position light for hands-free use

Handles tough conditions easily

• Resistant to impacts, water and solvents (IP65/IK07)

Extended warranty

• Extend your warranty online to 3 years

Highlights

Illuminate the whole work area

Whether you need to light up a work site, temporarily replace a wall lamp or illuminate outdoor activities, the Philips Xperion 6000 Flood audio projector is perfect for lighting up large dark areas. Delivering a powerful 1000 lumen (10 W), its consistently bright light gives off a super wide beam. If you need less light and more battery life, you can easily dim the lamp to a 100 lumen output.

Multi-purpose light

Different jobs demand different amounts of light. The Philips Xperion 6000 Flood audioenabled projector combines in one lamp the two most commonly used forms of workshop lighting. A wide-angle homogeneous flood light for working on big areas over longer periods, and a focused light that concentrates illumination within small areas to get the best contrast and brightness, ideal for detailed inspections and narrow spaces.

Enjoy your music at work

Get the job done to music by wirelessly connecting your phone via Bluetooth to the Philips Xperion 6000 Flood audio-enabled projector to play your music loud and clear.

Recharge other devices

The Philips Xperion 6000 Flood audioenabled projector can also be used as a power bank to charge other devices, such as your phone. Simply plug your device into the USB port on the back of the lamp and it will begin charging.

Control your light remotely

If you need both hands free for work, you can remotely power the light on or off by simply waving your hand. Designed to ignore unintended movements, the sensor only responds to a specific double-wave gesture.

Smart-zoom knob

Co-designed with mechanics, the ergonomic smart-zoom knob allows you to adjust your light from wide flood illumination to focused brightness easily, even with your gloves on. Positioned on the side of the lamp, the rotatable smart-zoom knob is always within reach, meaning you don't have to move the lamp from its mounted position. The lamp's smart design enables it to remember your last setting and restart directly at the desired intensity.

Versatile attachments

The smart handle can be used as a support to hold the projector up by itself or as a hook to hang the light from, and can be screwed on to a tripod or attached to any metal surface with its integrated magnets. This versatility allows you to position the light easily and at the right angle, directing the beam just where you need it.

Designed for durability

Designed to handle tough work environments with IK07 shock resistance, water-resistance to IP65 standards, and a surface to withstand chemicals and workshop solvents, the Philips Xperion 6000 Flood audio-enabled projector is built to last because we know that even the steadiest hands need extra help.

Up to 3 years' warranty

Benefit from a Philips standard 2 year warranty plus 1 additional year*.

Specifications

Electrical characteristics

Battery capacity: 4400 mAh mAh Battery charging time: Up to 5 h Battery run time (audio): 20 h Battery run time (boost): 3 h Battery run time (eco): 22 h Battery run time (pointer): 9 h Battery type: Lithium battery Charging cable type: Type C USB Plug type: EU plug (not included for UK)
